- Length 1800mm, weight approx. 150kg.
- Supplied with frames assembled, with separate boards to bolt on
- See our website for fixing options

Constructed from green European Oak, treated softwood or Iroko (see our website for timber options and finishes), this substantial unit has been designed to blend into, or create, rural environments such as country parks, riverside walks and forest paths.

Galvanised reinforcing brackets add to the strength of this unit without detracting from its appearance. A disabled access version (DA) is available with the table boards extended on one end by 200mm, for a small additional cost. The top face and edges of each seat board are planed, the remaining components being rough sawn. When specified in Iroko, all the surfaces are planed and sanded.
